

Cold Store Rack Labels

Minimum application temperature: -65°F or -54°C

Developed specifically for the distribution and logistics industry, our cold store and freezer rack labels are made to be applied in operational cold storage facilities. Upgrades in warehouse management systems and facility maintenance work creates the need for retro applications.

We understand that these products must also withstand such a harsh environment which is why we use our plastic composite technology to create a very durable product.

The laser print process used in the production of these labels, combined with the synthetic core material, gives superb print quality with outstanding verification rates.

Cold store and freezer rack labels have many features including:

- Plastic core with laser print quality,
- High durability coatings,
- Freezer applicable permanent adhesive,
- Minimum application temperature -65°F or 54°C,
- Service temperature 212°F or 100°C
- Adheres well to structural steel beams
- Any label size up to 17" x 11",
- Full installation services available.

High visibility multi-color labels are available for more accurate eye-readable location and check digits.

Color options available.

600/1200dpi print quality.

Can be drilled.

No barcode shrinkage.

High strength permanent adhesive.

Ideal for freezer application.

Double-sided lamination.

Supplied as singles if required.
