

Aisle marker signs are used in warehouses to identify aisles by using numbering or character sequences to help employees find locations easily and are generally fixed to the end face of racking and shelving.

Aisle marker signs are manufactured from 1/8" PVC with industrial grade Vinyl characters and are the ideal way to identify rack and shelf ends.

The signs can be fixed with double sided adhesive pads, self tapping screws or can be suspended.

Aisle signs for racking can be manufactured in a range of sizes but are normally 12" x 12" for a single character sign, or 12" x 16-18" for a double character sign.

Shelf markers are normally smaller, 8" x 8" for a single character or 8" x 12" for double character signs.

Aisle markers can be manufactured in any size and in a wide range of material colors.

#### Additional Information:

- Fast and efficient to install,
- Standard sizes available,
- Range of optional colors,
- Long lifespan for internal use,
- Can carry bay numbers, arrows and barcodes,
- Full installation service available.

Color options available.

Any application temperature.

Can be drilled.

Barcodes can be applied.

Washable.

Temporary and permanent attachment.

Can be used in freezers.

Light, chemical and moisture resistant.

Installation services available.
