

Magnetic location labels are produced from a unique 30 & 60mil magnetic rubber material that is flexible yet tough, making them ideal for use in warehouses and distribution centers.

Designs and layouts are unlimited but to help, we provide common standard sizes and recommended layouts which are taken from an archive of design formats from previous projects. Custom design and variable data handling gives us the benefit over typical label producers. Our understanding of the logistics environment helps to make is unique.

The magnetic material is flexible and tough which is ideal for

use in warehouses, storage areas and for temporary sign requirements.

Mono and color magnetic labels are supplied as standard and help with identification particularly when working with multi-level storage environments.

Content may include barcodes, eye readable information, numeric, alpha and alphanumeric permutations. 2D barcodes and variable images are also handled by our design and production teams.

Full installation services are also available for all rack labeling needs.

Color options available.

600/1200dpi print quality.

Suitable for use in freezers.

No barcode shrinkage.

Applicable in all temperatures.

Temporary attachment.

Lamination available.

Supplied as singles.

Installation services available.
