

Warehouse aisle signs are used to identify rack and floor storage aisles by displaying numbering and/or character sequences, which help operatives find pallet locations easily. They are generally attached to or hung at the end face of racking and shelving.

Aisle markers are manufactured from 1/8" PVC with content printed direct or applied using industrial grade vinyl. Both are ideal for internal use and provide a considerable lifespan.

The signs can be attached with double sided adhesive pads, self-drilling screws or they can be supplied with holes for hanging hardware.

Aisle signs for racking are manufactured in a range of sizes, most commonly 12" x 12" for a single character sign, or 12" x 16-18" for double character signs.

Shelf markers are generally smaller, 8" x 8" for a single character or 8" x 12" for double character signs.

The signs can also be manufactured in any material to withstand considerable temperature fluctuations.

**Additional Information:**

- Fast and easy to install,
- Standard sizes available,
- Range of optional colors,
- Print to board technology,
- Long lifespan for internal use,
- Can carry bay numbers, arrows and barcodes,
- Full installation service available.

Color options available.

Any application temperature.

Can be drilled.

Barcodes can be applied.

Washable.

Temporary and permanent attachment.

Can be used in freezers.

Light, chemical and moisture resistant.

Installation services available.
