

Warehouse hanging signs are a highly visual method of identifying bulk storage areas in warehouse and distribution centers. Barcode signs are designed for easy use, to be clearly read and long lasting.

The signs provide a point of reference to identify locations, in most cases being read from a distance. They are typically positioned around 15 to 30ft from the floor and at an angle so the barcode and eye-readable is directed toward the reader.

Hanging signs are supplied in a range of standard formats, however customer specific and specialist designs can be created easily in-house if needed. All materials used are lightweight with full color options available.

ASG Services' personnel are trained and insured to provide professional installation services to the highest standard and rigorously follow company standards and procedures.

Installing warehouse barcode signs can be dangerous due to working at height, we always urge caution.

Additional information:

- Many color options,
- Tough, lightweight materials used,
- Barcode and data labels provided,
- Full installation services available.

	Can be hung individually.		Suitable for drilling.		Suitable for use in freezers.
	Color options available.		Barcodes & eye readable content available.		Installation services available.
