

# Warehouse Signs – Custom Sign, Custom Name...

## Shelf Signs

Our custom signs can be produced to be an exact replica in a smaller version, which is typical with shelf and aisle signs.

## Aisle Signs

The most well recognized warehouse identification product. Aisle marker signs are the first referred to when looking for a location within a warehouse. Produced from plastic with vinyl characters, arrows, barcodes, logos, you name it.

## Rack Capacity Signs

An information sign designed to present specific load capacity data for warehouse racks and shelves. These signs may seem relatively insignificant, but they can help prevent a rack from being overloaded and collapsing later causing major damage and possible closure to your facility.

## Wall and Door Signs

These are very much one in the same type of sign, portraying information about what is behind the door or wall. They can be screwed, glued or nailed.

## Floor Signs

Effectively causing a person to look at the floor to avoid a trip hazard, floor signs are produced from durable materials with a variety of messages and images. They are ideal in pedestrian traffic area.

## Dock Door Signs

External dock signs are produced from extremely durable weather resistant aluminum composite materials. The Internal versions are made from less resistant material, but are none the less durable.

A range of information and data can be added to both types although basic numbering or letters are most common.

A range of information and data can be added to both types although basic numbering or letters are most common.

## Personnel Door Signs

Made from plastic and metal base materials, these are great for labeling rooms, inviting to enter and preventing access areas.

## Warehouse Barcode Signs

These are signs constructed from a formed plastic sheet which are produced complete with eye readable content as well as barcodes produced on reflective material to allow for long range scanning.

The signs are typically attached to a pre-installed trapeze system, suspended from the ceiling and positioned on an angle so they can be easily read and scanned from the ground.

## Dry-Wipe Boards

These signs/boards are available in a range of sizes and are popular with planners and managers alike, as temporary message boards, presentation displays and training units.

## Trailer Barcode Signs

Produced using highly durable materials, these label/signs are fully equipped with high strength adhesive, high definition barcodes and are available for easy application to cleaned surfaces.
