

LAMINATED RACK LABELS

By the warehouse identification & marking specialists

ASG Services design laminated rack labels to cover a wide range of storage formations. More specifically as individual shelf and rack beam location tags. Polyester laminated labels are ideal for barcode scanning, location, and check-digit information, complete with a protective coating to prolong the lifespan of the label.

The laser print process used in the production of rack labels gives outstanding verification rates, while the polyester over-laminate coating provides added protection.

Laminated rack labels have features including:

- Tough polyester base material and laminate,
- High-definition laser print,
- Permanent adhesive,
- Excellent barcode quality,
- Unlimited range of label sizes,
- Magnetic backing available,
- Full installation services available.

High visibility dual color labels are available for quicker more accurate location identification, with check digits for confirmation.
